

CircleContainer::delCircle

```
graph LR; A[CircleContainer::delCircle] --> B[Circle::getName]
```

A diagram illustrating a function call. On the left, a gray rectangular box contains the text "CircleContainer::delCircle". A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text "Circle::getName". Both boxes have a thin black border.

Circle::getName
